AN IMPORTANT MEMORIAL

From the Medical Men in Regard to the Mortality in East Wheeling.

A Solemn Warning to Council to Relieve

the Protection of the Public Health.

Fo the Committee on Health of the Council of the City of Wheeling: GENTLEMEN:—The undersigned practiioners of medicine, having been in atendance on numerous cases of Diphtheria in East Wheeling, have been impressed with the fact of its being almost entirely confined to that locality, resulting in great fatality; and believing that both are owing to some local cause, we take the liberty of addressing your committee on the subject, and through you asking the City Coun-

cil to extend a helping hand in preventing the further spread of a disease that has be-come almost a scourge to the citizens of the Fourth Ward. Diphtheria is known to be a disease

On the principle that "an ounce of pre-

abounds.

On the principle that "an ounce of prevention is better than a pound of cure," we venture to ask you to have sewers placed in the streets and alleys of East Wheeling, the sewers to be laid deep enough to drain the cellars, and the property owners to be compelled to connect their houses with them. The enforcement of the ordinance in relation to draining waste water on the streets and alleys would compel the connection to be made. We would suggest that owing to the conformation of the ground on Fourteenth, sixteenth, and Seventeenth and Eighteenth streets, 18-inch crock sewers should be placed on the north sides of these streets to drain the lots on that side, and that similar sewers be placed in Alleys 11, 13, 14, 15 and 16, to drain the lots on the south side of the above mentioned streets. Fifteenth street should have one sever In the middle of the street. The brick sewer on Seventeenth street, from Jacob to Eoff streets, should be removed, and another laid deeper, as it now answers no useful purpose in draining the cellars on that street, the cel-

Wheretine Female College—Interestrated with the second of the Wheeling Female College, under the lable and successful management of affiss A. Taylor. Soon after the hour of opening the college halls and reception rooms literally teemed with the happy throng of visitors, pupils, toachers, trustees and patrons of the institution, and to judge from the success of this first day, the fifth year is but the fifth round of the ladder in the upward progress of the institution to that plan of excellence, which shall make it the pride of West Virginia, as it is now of the progressive and public spirited citizens of Wheeling.

After an appropriate opening by singing and prayer, the President of the Board of Trustees, Mr. C. D. Hubbard, arose and in a short speech of welcome, made all feel that in him they had an intelligent and sympathetic friend. He urged the pupils to devote themselves with renewed energy to the important work in which they were engaged, and begged them to realize that they were laying the foundations of life-long character. In conclusion he referred to the improved appearance of the college building, and said that never since the foundation of the Institution had it given such vidence of so thorough and complete a refitting. The President them introduced Judge G. L. Cranimer, who enchained the attention of all ough and complete a refitting. The President then introduced Judge G. L. the Fourth Ward.

Diphtheria is known to be a disease whose prevalence and fatality are largely due to causes which are preventible, and none of these contribute more to its progress than accumulations of decomposing animal and vegetable matter, and badly drained and illy ventilated houses.

In East Wheeling the surface consists of a loemy sand, while beneath is found a bed of stiff clay. The upper stratum of sand becomes saturated with the drainage from the houses, and the underlying bed of clay prevents it from passing away, and there it remains, breeding the germs of disease. The greater part of the same territory is "aprouty," or in other words permeated with veins of water, which formerly made their appearance in springs in different localities, but since the lots have been built on many of the cellars have become the places where the water unkessits appearance, and not only these cellars but the cellars of entire rows of adjoining houses have become saturated with water. With the cellars damp and the drainage from the houses saturating the yards, it is not to be wondered at that "an ounce of prevention is better than a pound of eure," of He did, however, and talked in such

himself, claimed to be entirely at home in talking to young ladies, and feared only that he would not know where to leave off. He did, however, and talked in such a manner and at such a length as to leave a very pleasant and genial impression on his auditors. The remainder of the forenoon was devoted to social intercourse, and an inspection of the college. This latter bore out the remark of Mr. Hubbard. The whole building has been overhauled, the library, parlors and college hall being especially noticeable. And behind the evidences of the enterprise of the President and the librality of the trastees, there is the substantial fact that the college is prospering, as is shown by the number of boarders present at the opening, and by the further fact that all of the rooms are engaged, some of the larger ones even having four inmates. We should have mentioned earlier that the musical exercises of the morning were directed by Miss. inesticated earner (ag. the missical exer-cises of the morning were directed by Miss Annie Logan, who will take the place, temporarily, of Miss Ely, of New York, the latter having been unfortunately detained by the illness of her mother.

by the illness of her mother.

One other circumstance must not be passed unnoticed. Just in the midst of the proceedings, an immense boquet was brought and dropped on the stage, it being the present of that benefactor and well-wighter of the college, and according to the general report, the benefactor and well-wisher of everyhody. The Best I Ever Knew Of.

J. G. Starkey, a prominent and influential citizen of lowa City, says: "I have had the dyspepsia and liver complaint for several years, and have used every remedy I could hear of, without any relief whatever, until I saw your Shiloh's Vitalizer advertised in our paper, and was persuaded to try it. I am happy to state that it has entirely cured me. It is certainly the best remedy I ever knew of." Price 76 cis.

Sold by E. Bocking, Odd Fellow's Hall;
O. E. Dwight, 24th and Chapline streets;
Laughlin Bros. & Co., Wheeling, and Husbands & Inskeep, Bellaire.

Shilon's Catabah Remedy.—A marvellous cure for catarrh, diphtheria, canker mouth, and headache. With each bottle there is an ingenious ansal injector for the more successful treatment of the complaint, without extra charge. Price 50 cents. Sold by E. Bocking, Odd Fellow's Hall; C. E. Dwight, 24th and Chapline streets; Laughlin Bros. & Co., Wheeling, and Husbands & Inskeep, Bellaire.

It is a fact well established by unquestionsble test mony that Hall's Hair Renewer renews, cleanses, brightens, invigorates and restores to its original color and instre, faded
gray or discolored nair, cheaply, quickly and
qurely. The poorest people prefer to buy it
and use it, rather than to proclaim in a manner more forcible than words can delineate,
through blanched locks or grizzly beard, that
they are aged and passing to decay. A very
short trial will convince the mean takeptical
that it does eradicate the geaip diseases which
rob the haft of its salor and life.—Fort Sout
